In the year 2045, the world had changed dramatically. Natural resources were scarce, and the economy had collapsed. The only stable currency was the Costco hotdog. The juicy, delicious and abundant sausage had become the standard form of payment, and the only thing that people valued.

Jane, a young woman living in the sprawling metropolis of New York, had always struggled to get by. She had never tasted a hotdog from Costco, and longed for the day when she could afford one. One day, she came across an opportunity to work as a delivery driver for a local hotdog vendor. She jumped at the chance, eager to taste the coveted treat for herself.

As she made her deliveries, Jane saw the lengths that people would go to get their hands on a hotdog. They would trade their most valuable possessions, or even resort to theft, just to get their hands on one. The desperation was palpable, and Jane couldn't help but feel a sense of unease.

One day, while making a delivery to the outskirts of the city, Jane stumbled upon a secret society. They were a group of rebels who had banded together to overthrow the hotdog currency. They showed her that there was more to life than the endless pursuit of Costco hotdogs, and that there was a way to reclaim their freedom.

With the help of the rebels, Jane was able to spread the word, and soon a revolution was underway. People started to see the absurdity of using hotdogs as currency, and the government was forced to find alternative solutions.

In the end, Jane learned that there was more to life than just hotdogs. She realized that the things that truly mattered were love, friendship, and community. And as the rebels marched through the streets, holding up signs that read "Hotdogs are for eating, not for currency," Jane couldn't help but smile, knowing that a better future was finally within reach.
